## SUMMARY

6 Years of Object-Oriented Programming experience, expertise in Swift, Objective-C, C/C++. I have written 5+ iOS apps using Swift, UIKit, SpriteKit, AVFoundation, AirKit, MapKit, as well as various Cocoapods for 3rd party libraries. Striving to stay on top of the mobile technology while keeping up with ever-changing iOS development and loving every minute of mobile engineering.

## EXPERIENCE

**MazeGeek** - Astoria, NY (www.mazegeek.com)                     Feb 2016 – Present  
**Software Engineer, iOS**  
Learning by doing, working in a diverse team, shipping real-world products. Collaborating and subcontracting with other developers to ensure enterprise-level code and products

- **Vinndo** -(Swift 4 , Xcode 10 , FirebaseMessasing, Firebase, Google MapSDK, ToastSwift, SwiftyJSON, IQKeyboardManager)  
  Designed, built and deployed a rapid, on-demand automotive parts finding application in collaboration with Vinndo iOS development team.

- **ScopePrice** (Swift 4.2, Xcode 10, Cocoapods, SwiftyJSON, NVActivityIndicatorView, SideMenu, BarcodeScanner, AWSAPIGateway, ,Alamofire, SwiftyJSON, Google Map SDK, IQKeyboardManager)  
  ScopePrice is a web application which specializes in affiliate marketing and serves its users by providing price comparison for a huge portfolio of products from various suppliers.

- **Keeno** (Swift 4.2, Xcode 10.2,ObjectMapper, Social network Kit, SDWebImage ,Firebase, Google Map SDK, Sketch, Alamofire, SwiftyJSON, Rest API's ... )  
  Keeno is a buying and selling app. Users can buy and sell products within the community by using the chat option. Promote your product & earn money through building a vast network.

- **MotoMez** (Swift, Xcode, Cocoapods, Sketch, Alamofire, SwiftyJSON, Rest API's ...)  
  Developed a fully functioning warehouse inventory app which is used for back and forth inhouse shipment tracking and capable to scan product barcode as well.

**Easy Alliance** – Boston, MA                     Dec 2014 –Nov 2015  
**Web Developer**  
Technologies: Ruby on Rails, HTML, CSS, JavaScript MySQL, Git ,Gitlab, Vim.  
Designed and developed roadmap for the web application which were stands for the User accessibility system. Maintained internal web tools for MySQL database backup and migration. Gather requirements in a weekly scrum and main stories. Weekly release and code reviews.

## SKILLS

Languages: Swift ,Objective-C ,C, C++, JavaScript  
Development Technologies: Xcode, UIKit, AirKi.t, WebKit, AVFoundation, Test Flight,CoreData, Firebase, GCD, ARC, Parsing JSON, Sketch App ,Git, Cocoa touch, CocoaPods, CoreML, CoreGraphics, CoreMotion, MapKit, MVC, Instruments, AWS, Ebay Web Service, RESTful APIs, Linux Server Configuration, MapKit,MySQL, PostgreSQL, Vim ...

## EDUCATION

Thomas Edison State University, Bachelor Of Computer Science (Remote)                     Sep 2018-Sep 2019

Bangladesh University, Dhaka, Bangladesh                     Feb 2011 -Dec 2012  
Bachelor of Science in Computer Science & Engineering

## ONLINE COURSES

Udacity Devslopes, Raywenderlich, Udemy, Linkedin Learning

## AFFILIATIONS

Institute Of Electrical and Electronics Association                     September 2015  
ACM - Association For Computer Machinery                     November 2015  
New York Entrepreneurs & Startup Network                     November 2016 - Present  
MSP - Microsoft Student Partner                     May 2011 - Dec 2012
